

OVERVIEW OF PROJECTS BY NEIGHBORHOOD AND QUALITY OF LIFE INDICATORS

This chart outlines each of the 57 projects outlined in Appendix A against the ImagineBham Framework and include quality of life indicators as collected from the [SHAPE Bham](#) studies. It also provides which communities are border or split by the interstate and/or railroad. Please note that the SHAPE Scorecard is a quality of life indicator that assesses a number of factors ranging from food access, walkability, job opportunities, and education access. It is ranked from 1 to 5 with 1 being the highest score and 5 being the lowest. Transit accessibility and pedestrian connectivity are ranked the same with 1 being the highest score and 99 being the lowest
