CENSUS TRACT CHART OVERVIEW:

The census tract chart shows details about the census tracts affected by the MLK Project. Links to each tract's profile are provided for reference. Highlighted in green are census tracts classified as extreme poverty, while those falling within the margin of error are marked in orange. The Appendices contain additional documents supporting the City's claim that the tracts labeled in orange should be deemed as extreme poverty for the ATIIP program. Lastly, census tracts **not** in extreme poverty are indicated in red.

Data from the <u>Climate and Environmental Justice Screening Tool</u> reveals that out of the 34 census tracts affected by the MLK Project, 24 are categorized as disadvantaged communities. A community falls into this category if it resides in census tracts ranking at or above the 90th percentile for disadvantaged indicators and the 65th percentile for low income.
